

NATIONAL COUNCIL OF EDUCATIONAL RESEARCH & TRAINING
REGIONAL INSTITUTE OF EDUCATION, SHYAMLA HILLS, BHOPAL- 462013, MP (INDIA)
(NAAC Accredited A+ Grade Institute)

FIRST ANNOUNCEMENT

INTERNATIONAL CONFERENCE
ON
EMERGING TRENDS AND INNOVATIONS IN SCHOOL SCIENCES

February 6 – 8, 2019

VENUE - REGIONAL INSTITUTE OF EDUCATION, SHYAMLA HILLS, BHOPAL- 462013 , (INDIA)

Education has the potential to transform individuals and societies. The National Council of Educational Research and Training being the apex body in the matters of school education is known to play a leading role in order to bring about qualitative improvements in school and teacher education in India since 1964. NCERT seeks to promote science education at the school level through development of science kits; organization of science exhibitions at the State and National levels; preparation of text books and supplementary learning materials; training of teachers and teacher educators; organization of seminars and workshops; and conduct of research.

Science and technology plays a vital role in the progress of civilization and humanity. Science education tempered with wisdom is the only and surest way to human welfare. A quality science education is not only necessary for the intellectual development, but it affects the scientific advancement and prosperity of the human race. The fundamental aim of science education, particularly at school level, is to inculcate scientific temper among the students and to provide them opportunity to practice through various scientific methods and activities.

This International Conference is planned to provide a platform to the stakeholders of school education across the globe, particularly those working in the field of science education, to share their researches, experiences and innovative practices. The outcome of the conference would be of immense help in designing the curricula and bring out pedagogical reforms for quality science education.

KEY OBJECTIVES OF THE CONFERENCE

1. To provide opportunities to science teachers/practitioners to share their innovative practices and researches in the field of school science education.
2. To promote excellence and innovations in current practices of school science education in various countries.
3. To promote understanding about emerging trends in school science researches in developed and developing countries.
4. To encourage collaborative efforts to enhance the quality of science education across the globe.
