Preface

The Library and Documentation Division (LDD) of the National Council of Educational Research and Training (NCERT), serves as a crucial hub for information, research, and academic resources, supporting the diverse needs of educators, researchers, and policy-makers in education. Established to foster an environment conducive to educational excellence and innovation, LDD plays a pivotal role in the dissemination of knowledge and the promotion of advanced learning in the field of academic research. LDD is recognized for its hybrid collection of old and new print collections of books, journals, reports, and other reference collections.

LDD subscribes to a variety of journals on the recommendation of concerned departments and esteemed faculty members of NCERT on related subjects of research like economics, education, education psychology, educational research, gender studies, geography, linguistics, mathematics education, physics, psychology, science, social science, teacher education, value education, etc.

With the mandate of Prof. Dinesh Prasad Saklani, the Hon'ble Director, NCERT, the Library and Documentation Division executes several specialized services for its patrons known as *edudoc services*. In this edition of "EDUDOC SERVICES: CURRENT CONTENT," the LDD has delved into and presented a compilation of content pages of the journals received in the library during December 2024. The service facilitates connecting academicians with published articles in journals. For the journals received in hybrid mode (Print+Online), a hyperlink has also been provided for ease of navigation to the digital contents of the journals. Library and Documentation Division (LDD) at NCERT cordially invites academicians to explore and utilize our extensive collection of print journals. Suggestions are solicited to spruce up the library services better in honor of effectively and efficiently serving the academic community.

(Dr. Akash)
Head, LDD
NCERT, New Delhi

CURRENT STATISTICS

Global Value Chains

Providing insights into India's evolving trade policy architecture, a set of seven articles focuses on how trade policy engages with different sectors in an era in which the momentum of globalisation is no longer driven by static comparative advantages or trade in raw materials and finished products but by global value chains that are reshaping the trade landscape. **pages 31–88**

Rural Structural Transformation

If job creation is a priority, policymakers should focus on scaling up investments in human and physical infrastructure in rural areas that have experienced a slower pace of job growth. **page 18**

Cropping System in MP

Madhya Pradesh's focus on supporting only rice, wheat, and soybean has missed the opportunity to diversify its cropping system by supporting crops like pulses and oilseeds. **page 26**

Non-agricultural Enterprises

Expanding non-agricultural enterprises in rural areas on a large scale, particularly women-owned ones, will go a long way in accelerating India's gross domestic product growth. **page 10**

CURRENT STATISTICS 89

LETTERS 4

Women-owned Non-agricultural Enterprises

10 Employment has increased by about 150 million between 2017–18 and 2023–24 in India. About half of this increase is traceable to the rising employment of rural female workers. — *Bishwanath Goldar, Suresh Chand Aggarwal*

Persistent Backwardness of the Rural Economy

14 The article examines the conditions of the rural economy, including poverty, unemployment, and agrarian distress resulting in a persistent backwardness of rural India. — *B A Prakash*

A Rural Awakening for Manufacturing

18 Amid a de-urbanising manufacturing sector, India needs to shift its policy focus to its small towns and rural areas. — *Ejaz Ghani*

Rice Cultivation in Madhya Pradesh

26 Madhya Pradesh's focus on supporting only rice, wheat, and soybean cultivation has led to a missed opportunity to diversify its cropping system. — *Arvind Sardana, P S Vijayshankar*

Global Value Chains

31 Seven papers provide insights into India's evolving trade policy architecture. — *Sachin Chaturvedi*

Exploring Trade, GVCs, and Technology Goods

33 This paper examines the efficacy of free trade agreements, focusing on trade flow patterns, trade balance, the structure of global value chain trade, and the composition of technology-intensive trade, among others. — *Saroj K Mohanty*

Agricultural Exports and Trade Policy Responses

42 The global economy has been witnessing a continued rise in agricultural trade over the last two decades. There is a distinct shift towards demand for high-value processed agricultural products for consumption. — *Sachin Chaturvedi*

Intermingling of Trade and Environment Policy

50 This paper studies the European Union-Carbon Border Adjustment Mechanism regulation, its impact on developing countries, and its compatibility with the World Trade Organization provisions. — *Rajeev Kher, Anshuman Gupta*

Export Prices, Exchange Rate Pass-through, and GVC

58 An examination of the factors influencing exchange rate pass-through to export prices using product–destination–time panel data suggests that it is incomplete across all products. — *Darpajit Sengupta, Saikat Sinha Roy*

Micro-level Export Management in Foreign Trade Policy

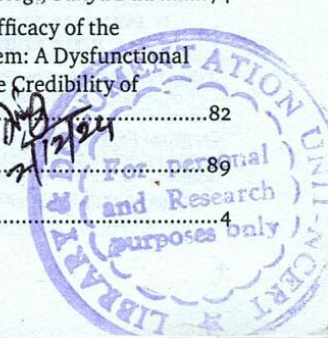

67 Indian exports at the district level are highly skewed, with nearly 50% of exports concentrated in the top 18 districts in 2023–24. The Districts as Export Hubs initiative would be able to reduce this export disparity. — *Pankhuri Gaur*

Bangladesh, Bhutan, India, and Nepal Motor Vehicle Agreement

74 The paper examines the role of the Bangladesh, Bhutan, India, and Nepal Motor Vehicle Agreement in enhancing the export competitiveness of the North East region by analysing the efficiency of the existing supply chains of selected products. — *Nisha Taneja, Biswajit Nag, Sanjana Joshi, Rashmi Rastogi & Sanya Dua*

Eroding the Credibility of the WTO

82 The elaborate procedures for rules-based, automatic and prompt settlement of disputes in the World Trade Organization functioned quite well until the United States put the security and predictability of the multilateral trading system into question. — *Atul Kaushik*

CURRENT STATISTICS

POSTSCRIPT

Patriarchy in the Film Industry

In the context of the Hema Committee report, two articles look at the cultures of silence prevailing in the industry, the normalisation of gendered violence, women's disadvantages with regard to labour, and institutionalised networks of male dominance. **pages 20 and 35**

K N Raj's Contributions

An appreciation of Raj's humanist vision, approach to theory, empirics, and policy, and focus on institutional contexts can contribute to recovering these aspects that have lost their salience in contemporary mainstream economics. **page 40**

The Caste Census in Bihar

While the 2023 caste census data confirms the presence of significant inequalities across castes within any social category, it also suggests that religion plays an important part in contributing to the inequality within administrative categories. **page 48**

Assembly Elections in J&K

What has added to the weight of JKNC is that it has emerged as the only party which has an effective presence in both Jammu and Kashmir regions. **page 16**

Climate Negotiations

The finance that carbon credits are expected to generate for developing countries to pursue their mitigation and adaptation agendas, as incorporated in their NDCs, may not materialise. **page 10**

COP29: Choosing Low-hanging Fruits Unfit for Purpose

10 In a surprise first-day declaration at COP29, a “deal” on the institution of carbon markets with clear rules for ensuring the assessment of claims and integrity of data was announced. — *C P Chandrasekhar*

Excavating the ‘Minority Character’ of an Institution

13 The Supreme Court in *Aligarh Muslim University v Naresh Agarwal* (2024) has not yet decisively affirmed the status of Aligarh Muslim University. — *Alok Prasanna Kumar*

The 2024 Assembly Elections in Jammu and Kashmir

16 Besides providing an opportunity for different political parties to test their ground, the assembly elections held after a gap of 10 years were important for the people of the state. — *Rekha Chowdhary*

The Macho and the Malayalam Film Industry

20 Ideas of normalisation and practices of power sabotage the democratic requirements of the Malayalam film industry that even the Hema Committee report as a social document is not free from. — *Lakshmi Priya N*

Beyond the Medal

23 The article explores the challenges faced by disability researchers in India, where issues of survival and poverty overshadow debates about identity and inclusion, as seen in Western contexts. — *Amitabh Vikram Dwivedi*

Disparity in Asset Holdings of the Household Sector

26 The definition of household adopted by the National Sample Survey does not always serve the intended purpose, prompting an examination of its suitability for estimating the distribution of rural and urban household assets. — *Dipankar Mitra, Alope Kar*

Women in Cinema and the Patriarchal Deep State

35 In light of the recent release of the Hema Committee report, this article analyses women’s continuous disadvantages with regard to labour, sexploitation, and workplace conditions within the cinema industry and its institutionalised networks of male dominance. — *Meena T Pillai*

The Scholarship of K N Raj

40 This paper revisits Raj’s approach to scholarship. The primary focus is not to address the content of his key arguments and findings or to evaluate whether they have stood the test of time. Rather, the purpose is to revisit Raj’s approach to learn what it might offer us today. — *Suraj Jacob*

Caste and Socio-economic Inequality in Bihar

48 The absence of caste-level data has been a pressing issue in India, with the long-standing demand for a caste census emerging as a major political point in the 2024 general elections. This paper aims to provide an overview of the insights gained from the Bihar caste census and its implications for understanding caste and tribe inequality. — *Christophe Z Guilmoto, Himanshu*

Why Do Farmers Leave Nutri-cereal Crops?

60 In recent years, the government has been trying to popularise nutri-cereal crops through various policy measures. However, data reveals that farmers have not reaped any appreciable profit in terms of cost c2 in any of these crops. — *A Narayanamoorthy, K S Sujitha & R Suresh*

Postscript

70 *Geethu Thomas* on elderly intimacy in Malayalam cinema; *Shashank Pandey* on deconstructing benevolent ableism through *Srikanth*; *Anannya Dasgupta’s* poem “Daughters like me”; and Last Lines by *Ponnappa*.

- And more ...

CURRENT STATISTICS

Nine papers undertaking a thematic analysis of the campaign and outcomes of the 2024 general elections focus on the effectivity of the INDIA bloc, election manifestos, the invocation of history in campaign speeches, the implications of the results for nation-building, competitive welfarism, the oligarchisation of democracy, the construction of a female constituency and the performance of the Congress party. [pages 35-112](#)

New Global System

The world is moving from a bipolar heterogeneous system, through the unipolar "moment" that existed between the disintegration of the Soviet Union and 2016, to a multipolar homogeneous system. [page 17](#)

App-based Attendance in MGNREGA

With the lack of accessibility and usability, mandating the NMMS application to record worksite attendance is an exclusionary practice that has also severely reduced workers' ability to hold the state accountable. [page 21](#)

Food Import Safety Regulation

The FSSAI has either explicitly thrust aside the legal provisions or failed to integrate the attribute of transparency while implementing them. [page 30](#)

A New Financial Architecture

10 The 16th summit of BRICS took significant steps in developing a financial architecture that is distinct from the Bretton Woods institutions. — *Anuradha Chenoy*

Punjab's Draft Farm Policy

14 An agricultural policy for Punjab has been long overdue given that it has been facing an agrarian crisis for the last 30 years. — *Sukhpal Singh*

A Tool for Transparency or Exclusion?

17 The impact of the NREGA Mobile Monitoring (NMMS) is examined two years after its deployment. — *Chakradhar Buddha, Laavanya Tamang*

Catalyst of a New Global System

21 While Russia is contributing to the erosion of a Western order and a return to the rules in the United Nations charter, it is ironically doing so by violating the same charter. — *Branko Milanovic*

Is Indian Food Import Safety Regulation Opaque?

30 Opacity in the working of the Food Safety and Standards Authority of India, regulatory gaps, and irregularities pose obstacles to India's food import safety. — *Surbhi Kapur*

General Elections 2024

Nine papers undertaking a thematic analysis of the 2024 general elections, highlight campaign trends, dynamics of alliances, electoral competition, and implications for political processes.

Continuity and Change

35 The results of the 2024 general elections have restored the parliamentary process and changed the country's political atmosphere. However, they were more a product of tactical alliance-building than any major shift in the social base of coalitions. — *K C Suri, Subrata Mitra & Rahul Verma*

A New Chapter in Pre-electoral Coalition Politics

45 The formation of the INDIA bloc, the dynamics of pre-electoral coalitions in India and their significance for electoral results are analysed. — *Adnan Farooqui, E Sridharan*

An Analysis of Election Manifestos

53 The analysis combines insights from spatial theory and salience theory to investigate where parties differ in their positions (spatial) or emphasis (salient) placed on issues. — *Ajit Phadnis, Abhishek Priyadarshi*

The Place of History in Election Speeches

64 Campaign speeches given by the Prime Minister routinely included references to the past. Given that elections are understood in transactional or material ways, references to abstract historical topics require interpretation. — *Andrew Wyatt*

'Nationising' India

71 Moulding India's diversity into a cohesive nation based on Hindu nationalism is the main ideological plank of the BJP. However, this strategy fell short of the expected electoral dividend in 2024. — *Subrata Mitra*

Technology for Votes

79 Technology disintermediates traditional political structures and centralises political attribution into the personal authority of party leaders. The paper calls this phenomenon "techno-patrimonialism" and examines its implications. — *Yamini Aiyar, Neelanjan Sircar*

Gendering Loyalty

87 Through a constructivist approach to populist political representation, this paper studies the conceptual terrain of the relationship between voter loyalty and populist democracy in the context of female voting in West Bengal. — *Proma Raychaudhury*

The Oligarchisation of Democracy

96 Employing data on the wealth and background of politicians, it is shown that over the last 20 years, India's politicians have not only become much wealthier but also more commonly have a business background. — *Ward Berenschot, Leiden Sarthak Bagchi & Vignesh Karthik K R*

Signalling Revival?

103 The Congress continues to lag behind in a head-to-head contest against the BJP, and its improved performance is largely in states where it was a junior partner in the alliance. — *Rahul Verma, Pawas Pratikshit*

SPECIAL ARTICLES

- On the Futures of Caste
- Applying OECD Policy Evaluation Criteria to Child Protection Schemes in Odisha, India
- A Political Economy Analysis of Recent Growth Slowdown in West Bengal

CURRENT STATISTICS

Materiality of Caste

Framings of the ideational and ritual life of caste often tend to assume a cultural and religious singularity while underplaying its embeddedness in material processes as a relational structure. **page 48**

Urban Informality

Reducing urban marginality unveiled in the aftermath of the pandemic as a one-time operational problem resulting from a mere lack of "data" will be a gross misrecognition of the entire issue. **page 41**

Forest (Conservation) Amendment Act

The state is transforming into a "safari state" that is seemingly more concerned about the expansion of tourism in the country's highlands than the stability of the ecosystem and the rights of the marginalised. **page 10**

Unified Lending Interface

It is anticipated that ULI, like UPI for payments, will become a pillar of India's digital lending infrastructure as it develops and becomes widely adopted. **page 14**

Suma Chitnis (1933–2024)

Bringing an intellectually inspiring perspective to bear on educational issues, Chitnis pioneered sociological studies of educational inequality and played a key role in establishing women's studies. **page 32**

‘Eminent’ versus ‘Illegible’

10 The Forest (Conservation) Amendment Act, 2023 contradicts the fundamental principles of earlier legislation and emboldens the state’s eminent domain, reverting the progress of social movements. — *Rama Naga*

Unified Lending Interface: A Game Changer?

14 The recent launch of the Unified Lending Interface by the Reserve Bank of India is an important step towards the further development of digital public infrastructure. — *Deepankar Roy, Partha Ray*

Beyond the Guaranteed Minimum Support Price

17 The issue of a legal minimum support price guarantee has divided not only political parties and governments but also the large community of farm experts, economists and commentators. — *P Alli*

How Will Banks Recognise a Significant Increase in Credit Risk?

22 One of the most innovative components of the Reserve Bank of India’s proposed expected credit loss provisioning framework for commercial banks is the concept of a significant increase in credit risk. — *Arindam Bandyopadhyay*

Assessing India’s Production-linked Incentives

26 The production-linked incentive scheme has emerged as a cornerstone of India’s industrial policy. However, the scheme has many design and structural flaws and missing links. — *Surendar Singh, Bibek Ray Chaudhuri*

Suma Chitnis (1933–2024)

32 With the passing of renowned sociologist Suma Chitnis, the country lost another academic who belonged to that early distinguished category of social scientists. — *Padma Velaskar*

A Reflection on Urban Informality

41 Delhi’s e-coupon relief programme saw the state come face-to-face with unaddressed forms of vulnerability in the urban informal economy. The article attempts to reflect on this administrative experience of the existing state systems and policy apparatus to draw possible insights for policy considerations in the present urban context. — *Hari Raghunath*

On the Futures of Caste

48 Caste persists, often manifesting with much greater vigour, even in modern urban contexts. The paper attempts to examine the futures of caste, arguing for a revisiting of its mainstream framings, both popular and academic, that remain “trapped” in a moral language while uncritically accepting the colonial and Orientalist imaginations that treat caste as an exceptional institution, unique to the Hindus of India. — *Surinder S Jodhka*

Applying OECD Policy Evaluation Criteria

58 The intergovernmental fiscal transfers and state-specific targeted programmes for children in need of care and protection and children in conflict of law are evaluated using the Organisation for Economic Co-operation and Development criteria. Using the theory of change, various fiscal interventions for child protection are analysed with activities, outputs, intended outcomes and impacts. — *Lekha Chakraborty, Amandeep Kaur, Jitesh Yadav & Balamuraly B*

Growth Slowdown in West Bengal

66 A political economy explanation of the growth trend post-2011 in West Bengal is provided based on a framework to understand the impact of corruption on economic growth. The difference-in-difference analysis shows that the economic growth rate has significantly declined post-2011, and has remained lower than the nation as a whole and significantly below other major Indian states. — *Debajit Jha, Jagadish Prasad Sahu & Parinita Singh*

CURRENT STATISTICS**POSTSCRIPT**

Review of Labour and Employment

Highlighting the multifaceted challenges India faces in fostering productive and inclusive employment opportunities, five papers examine the long-term shifts in the labour market, barriers to youth employment, new technology and employment, the evolving role of digital work, and changes in rural livelihoods. **pages 35–92**

Precarity in the IT Sector

Proposals to extend working hours would further exacerbate vulnerabilities stemming from unhealthy workloads, wage stagnation, a competitive corporate culture, pervasive informality and absence of social security provisions and the recent wave of mass lay-offs. **page 13**

History of Nagaland State Transport

While NST was envisioned and operated in a difficult political context of militarised mobility, often subjected to stoppages and blockades, it embodied a new way of social mobility and connectedness. **page 29**

Financing Global Public Goods

The "Third Balance Sheet" gets us resilience in vulnerable places without sinking them in debt, by internalising the social costs and benefits of fossil fuels and renewables with a modest levy. **page 10**

The 'Third' Balance Sheet

10 Can we create a third balance sheet just for investments in climate resilience that generates savings, and have it financed through a combination of global levies and equitising these future fiscal savings? — *Avinash Persaud*

From Overtime to Overreach

13 The proposed amendment to the Karnataka Shops and Commercial Establishments Act, 1961, aiming to extend the information technology sector's working time to 14 hours, is critically analysed. — *Shonima Nelliatt*

Disaster Management by Panchayats

17 Policy and planning for preparedness to disasters could be moulded well to suit local communities, if only grassroots-level institutions are actively involved in the process. — *K R Sastry*

Changing Contours of Global Climate Justice

20 Interrogating the framework of just energy transition partnership, the article examines its contribution to a reshaping of climate justice. — *Garima Maheshwari*

Nagaland State Transport: A Spatial History

29 In a tortuous landscape, a spatial history of Nagaland State Transport enables a different history of modernity in Nagaland: the emergence of new towns, roads, and social mobility. — *Vizokhole Idu*

Review of Labour and Employment

35 Five papers explore key themes surrounding employment in India, including long-term shifts in the labour market, youth unemployment, technology, and the evolving role of digital work. — *Alakh N Sharma*

India's Growth and Employment Patterns

38 The paper analyses the patterns and trends in India's labour markets from 1983 to 2024. It also examines the long-term trends in labour force participation rates with a focus on the recent surge in women's work participation, structural change, employment quality and labour market inequalities. — *Alakh N Sharma, Balwant Singh Mehta*

Education, Employment, and the Youth Labour Market

54 While the demand for higher education is driven by the positive relationship between education, employment quality, and market returns, this paper shows that returns are getting moderated over time, and more and more highly educated young people are overqualified for the jobs they hold. — *Ravi Srivastava, Siddharth Dhote*

New Technologies, Employment, and Inequality

65 During the last two decades, technological change in India has increased the demand of high-skilled labour while reducing employment opportunities for low-skilled labour across both manufacturing and services sectors, modestly contributing to income inequality. — *Ajit K Ghose, Balwant Singh Mehta*

Precarity or Empowerment?

75 There is heterogeneity of workers on digital platforms with varying work contracts; not all are precarious. Digital wage and salary work, characterised by structured employment arrangements, may be economically more precarious. In contrast, self-employed workers leveraging platforms to enhance market reach may exhibit greater economic security and control. — *Jeemol Unni, Ravikiran Naik*

Ruptured Rural Transformation

84 The analysis suggests worsening of India's rural transformation, aggravating from "being stunted" to a rupture. Labour movement from agricultural to non-agricultural sectors had weakened since the early 2010s. Signs of reverse mobility are visible since the 2020s, with significant addition in unpaid family work. — *Vinoj Abraham*

Postscript

95 *Pratiti Roy* on understanding mourning and melancholy through *Pieces of a Woman*; *Tapas Mitra* on revisiting Ritwik Ghatak's *Komal Gandhar*; *Basundhara Roy's* poem *Dietary Prescription*; and *Last Lines* by *Ponnappa*.

- 531 Traditional Healing as Mental Health Intervention: Contemporary Insights From an American Indian Healer*
Kiara M. Tanta-Quidgeon, Mona Stonefish, Rachel E. Wilbur, and Joseph P. Gone
This thematic analysis of an interview with an American Indian healer provides an illustration of how Indigenous traditional healing is conceptualized and practiced. The findings underscore the need for transformative change in psychology research and practice, advocating for professional consideration of a broader range of therapeutic rationales, traditions, and practices.

- 543 The Meaning of Black History: Development and Validation of the Scale of Black History Consciousness
Collette Chapman-Hilliard
The relevance of Black history to the advancement of African descent people is evident in literature across multiple disciplines. Findings from this study present a brief measure designed to assess the meaning and importance of Black history for African descent people. Being able to measure the extent to which African descent people hold beliefs about the value of Black history in their lives can illuminate how Black history influences mental health in a manner that may proactively challenge anti-Black racism and facilitate community perpetuity.

- 558 Associations Between Misgendering, Invalidation, Pride, Community Connectedness, and Trauma Among Nonbinary Adults
Alex E. Colson, Em Matsuno, Sebastian M. Barr, and Ashley K. Randall
The findings of this study suggest that misgendering and invalidation are associated with trauma symptoms among nonbinary people. Results can be applied to inform nonbinary-affirming clinical practice and advocacy.

- 569 Korean Transgender and Nonbinary Workers' Development of Critical Consciousness Through Interpersonal Relationships at Work: A Grounded Theory
Joonwoo Lee and Bora Lee
Through experiencing changes in interpersonal dynamics, social roles, and statuses at work throughout gender transition, Korean transgender and nonbinary workers gained a unique and critical consciousness of how gender operates within workplace and society. This facilitated Korean transgender and nonbinary workers to find a balance between who they want to be and others' expectations and to strive for social action in and out of the workplace.

- 583 The Social Microcosm Revisited: A Replication of Kivlighan et al. (2021) on the Reciprocal Relationship Between In-Session and Intersession Intimate Behaviors
Gianluca Lo Coco, Dennis M. Kivlighan Jr., Maria Di Blasi, Cecilia Giordano, Francesca Giannone, and Salvatore Gullo
We examined the reciprocal relationship between a group member's intimate behaviors and the aggregate of other group members' intimate behaviors. If the other members of the group engage in more intimate behaviors, like sharing feelings and expressing anger or caring, in their relationships outside of group during the previous week, then a group member will be more likely to engage in these intimate behaviors in the current group session. In addition, if the group member and the other members of the group learn and practice new intimate behaviors in the previous group session, then the group member will be more likely to engage in these intimate behaviors in their relationships outside of the group during the current week.

- 596 Examination of the Psychometric Properties of the Ethnic Identity Scale (EIS) and Multicultural Identity Integration Scale (MULTIIS) in a Multiracial Population in the United States
Jaimie Shaff, Annabelle L. Atkin, Geoffrey Kahn, and Holly C. Wilcox
 Racial, ethnic, and cultural identity development are increasingly recognized as integral to the health and well-being of racially minoritized populations. The study highlights a significant gap in the assessment of ethnic and cultural identity, showing that current measurement tools might not be suitable or may need careful interpretation for Multiracial individuals. With the increasing growth of Multiracial populations in the United States, it is vital to ensure that these tools are appropriate for use with this diverse group.
- 606 Development and Initial Validation of the Career Wisdom Scale: A Resource in Handling Uncertainty in Contemporary Career Development
Hui Xu
 The present study develops and initially validates the Career Wisdom Scale and supports its psychometric performance, including predictions for well-being and adjustment. Thus, the study offers a sound measurement tool for research on career wisdom and adds theoretical and empirical insights to conversations about handling ambiguity in career development.
- 621 Perceived Parental Career Expectation and Adolescent Career Development: The Mediating Role of Adolescent Career-Planning and Goal-Setting Self-Efficacy and the Moderating Role of Perceived Parent-Adolescent Career Congruence
Nan Zhou
 Findings of this study suggest the importance of enhancing adolescents' perceived congruence between parents and adolescents in terms of child career interests, goals, and plans and promoting adolescents' confidence in achieving future career success to prepare them well for the job market. Overall, this study yields empirical evidence supporting the critical roles of family influences and the consistently acknowledged effect of career-planning and goal-setting self-efficacy for adolescents' career development, particularly in the Chinese culture context.
- 633 Exploring Therapist Effectiveness Across Multiple Domains Over Time
Jeremy J. Coleman, Emma Freetly Porter, Sabina Musliu, S. Mark Kopta, and Jesse Owen
 Our study found that therapists become less effective on some outcomes over time, without improvement or decline on others. This has implications for predicting treatment success or failure and supports the idea of matching therapists with clients based on specific strengths in certain domains.
- 644 Psychotherapists' Outcome Expectations: How Are They Established?
Janne Låver, Andrew Athan McAleavey, Irene Valaker, Katrine Frammarsvik, and Christian Moltu
 This article explores how therapists' expectations of their patient's psychotherapy processes are established. Rather than being purely based on patients' characteristics and clinical assessments, therapists report that their expectations are influenced partially by a sense of a "fit" with their patients, as well as organizational and systemic factors outside of their control. These factors, which may increase bias and affect treatment decisions, should be a focus of future studies and interventions.
- 659 Critical Social Media Literacy Buffers the Impact of Online Racism on Internalized Racism Among Racially Minoritized Emerging Adults
Brian TaeHyuk Keum and Andrew Young Choi
 Critical social media literacy can protect racially minoritized emerging adults from online racism, including by attenuating internalized racism—a correlate of numerous behavioral health outcomes. It is imperative to promote critical education that empowers racially minoritized individuals with the social media literacy needed to counteract the 21st-century cyberscape of racial hate and violence.

PHYSICS TODAY

November 2024 • volume 77, number 11

A publication of the American Institute of Physics

WHAT MAKES A
BIG CAT ROAR?

**Physics, AI, and the
future of discovery**

**Ancient minerals as
particle detectors**

**Maurice Sendak,
physics illustrator**

PHYSICS TODAY

November 2024 | volume 77 number 11

FEATURES

30 Physics, AI, and the future of discovery

France Córdoba, Valerie Browning, Walter Copan, Evgeni Gousev, and Jesse Thaler

Leaders from industry, government, and academia discuss the potential impact of AI on physics—including neutrinos, exoplanets, term papers, outreach, and workforce gaps—and of physics on AI.

38 Where the atomic nuclei are: Maurice Sendak, physics illustrator

Ryan Dahn

The first credited work of the famed children's book author was a set of illustrations in a 1947 popular-science book about nuclear physics.

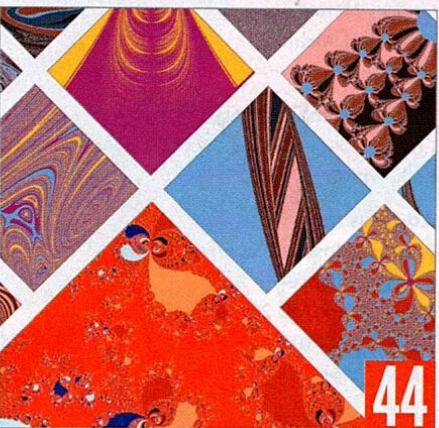

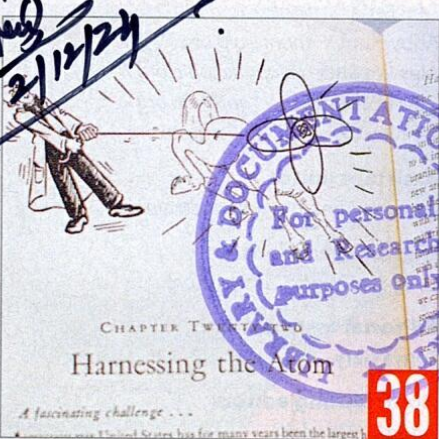

44 Multistability and unpredictability

Álvar Daza, Alexandre Wagemakers, and Miguel A. F. Sanjuán

In numerous physical systems, from tossed coins to black holes, the complexity arising from the coexistence of different outcomes limits our ability to make predictions.

ON THE COVER: Of the five big cats in the genus *Panthera*, four can roar: tigers, lions, leopards, and jaguars. Both the size and the shape of their voice boxes contribute to their ability to produce their trademark calls. For more on the physics of roaring, turn to the Quick Study by Ed Walsh and JoAnn McGee on **page 54**. (Image by Jason Keisling.)

T-storm gamma rays

The high-energy electric fields that produce lightning can also generate gamma rays. Using a converted spy plane, researchers flew above thunderstorms and observed a new class of atmospheric gamma-ray emission. The work could improve understanding of the physics of thunderstorms. physicstoday.org/Nov2024a

SANT'ANNA SCH. ADVANCED STUDIES

Prosthetic hand

A newly developed prosthetic hand responds to muscle contractions rather than to electrical signals from the brain. The hand's movement is dictated by the relative positions of small magnets implanted in a user's arm. A trial participant was able to perform daily tasks such as tying shoelaces. physicstoday.org/Nov2024b

NASA/NIKOLE NIELSEN

Galactic boundaries

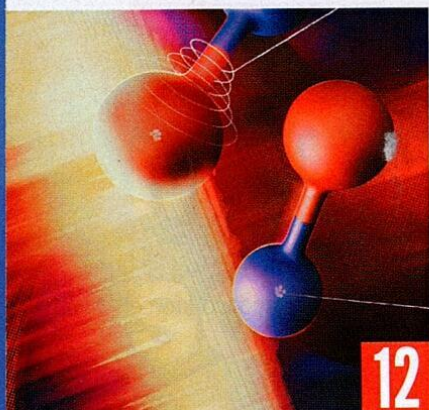

Where does a galaxy end and intergalactic space begin? Researchers recently charted the surface brightness of a galaxy's gas as a function of distance from the galactic center and found an abrupt shift in the brightness curve's shape. Such an approach could help standardize measurements of galactic size. physicstoday.org/Nov2024c

(This issue is available in electronic form at <http://www.BAMBEd.org>.)

EDITORIAL

Transforming undergraduate education: Meeting report from the 2023 ASBMB summer education conference (pages 486–491)

Pamela S. Mertz, Odutayo O. Odunuga, Celeste N. Peterson and Joseph J. Provost

Published online 14 July 2024 in Wiley Online Library | DOI: 10.1002/bmb.21848

ARTICLE

Teaching effects of the online and offline flipped classroom model (FCM) in the post-epidemic era: Development and feasibility study (pages 492–504)

Shumin Wang, Yizhi Liu, Fengze Wang, Baochang Zhao, Lijun Gao and Miao Guo

Published online 22 April 2024 in Wiley Online Library | DOI: 10.1002/bmb.21834

§ **Bridging the biochemistry lecture and laboratory courses: Construction and application of the “Innovative Experimental Design” module (pages 505–511)**

Pengfei Li, Boya Zhang, Shuaifei He, Yuqing Lu, Wenli Jiang, Qingsong Zhong, Shu Quan, Haizhen Wu and Mian Zhou

Published online 15 April 2024 in Wiley Online Library | DOI: 10.1002/bmb.21835

Enhancing engagement and learning in advanced biochemistry through the application of flow theory (pages 512–518)

Jiafa Wu, Ying Wu and Shaobin Gu

Published online 30 April 2024 in Wiley Online Library | DOI: 10.1002/bmb.21836

Enhancing complex bioprocess learning through simulation technology and hybrid teaching: A case study in university education (pages 519–526)

Davor Cotoras

Published online 6 May 2024 in Wiley Online Library | DOI: 10.1002/bmb.21838

§ **High-impact practices in cancer education and research: Undergraduate students' perceptions of skills and career development (pages 527–539)**

Mohammad A. Al Hakani, Edward A. Grimmer, Eleftheria Laios, Jake Frank, Subidsa Srikantha, Kaila Wilson, Karen Metcalfe, Caroline Hamm, Lisa A. Porter and Dora Cavallo-Medved

Published online 30 May 2024 in Wiley Online Library | DOI: 10.1002/bmb.21839

§ **Improving critical thinking skills of preservice chemistry teachers through integrated biochemistry course (pages 540–548)**

Andi Wahyudi and Yusinta Dwi Ariyani

Published online 28 May 2024 in Wiley Online Library | DOI: 10.1002/bmb.21840

On the cover: Feasible and economic DIY procedures of a hand-held fluorescence detector set—FluorDetector to assist laboratory course development.

YOJANA, a development monthly published since 1957, is a theme-based journal providing in-depth analyses and views on socio-economic issues in the broader framework of government policies. Although published by the Ministry of Information and Broadcasting, YOJANA is not restricted to expressing the official point of view.

DISCLAIMER

- The views expressed in various articles are those of the authors and they do not necessarily reflect the views of the Government or the organisation/s they work for.
- Maps/flags used in the articles are only indicative and they do not reflect the political map or legal representation of the flag of India/any other country.
- The infographics/figures are provided by the authors through their reliable sources and YOJANA claims no responsibility for the same.
- Images, graphics and illustrations, wherever used, are mostly sourced from government channels and are indicative in nature.
- YOJANA does not own responsibility regarding the contents of the advertisements. The readers are requested to verify the claims in the advertisements regarding courses, career-guidance books or institutions.
- YOJANA doesn't endorse or promote any brands or private entities presented as case studies in any of the articles.
